Projects

Face Recognition Based Attendance System: As a frontend developer, I played a pivotal role in the development of a Face Recognition Based Attendance System. My responsibilities included real-time face recognition implementation. I contributed to the project's success by making login page, Admin dashboard, Student Table . This System features an admin dashboard for efficient monitoring of student attendance.. Languange used :

- Html
- Css
- Javascript

Exopy : It's an OTT platform like Netflix which i made from Tmdb API . As a Front end Developer, I create a customized movie data platform for user experiences, I made the website better so that user can used it properly, Libraries used :

- Django
- Request
- PostgreSQL
- Html
- CSS
- JS

Others :

- Calculator and clock using Html Css and JS
- Songs Playlist Using Html Css and Js

Technical Skills

Programming Languages

- HTML
- Css
- Js
- Python (Basic)

Frameworks :

- React Js
- Git

Others :

- Software Development
- Testing principles
- Communication skill
